POWERED BY

HYPERKEWL™ PLUS

HyperKewl™ PLUS Evaporative Cooling material is a unique fabric that absorbs and slowly releases water through evaporation. When the water evaporates, a cooling effect occurs. We look at this process as "super-charging" the body's natural cooling process, thereby helping the wearer to combat heat stress.

HOW TO USE :

1. Soak your HyperKewl™PLUS item in clean water for 1-2 minutes
2. Gently squeeze out the excess water
3. Your HyperKewl™PLUS item is ready to wear!

The garment will remain activated for 5-10 hours and can be re-hydrated by repeating these simple steps.
