POWERED BY

# HYPERKEWL™

HyperKewl™ Evaporative Cooling material is a unique fabric that absorbs and slowly releases water through evaporation. When the water evaporates, a cooling effect occurs. We look at this process as "super-charging" the body's natural cooling process, thereby helping the wearer to combat heat stress.

#### HOW TO USE :

1. Soak your HyperKewl™ item in clean water for 2-3 minutes
2. Gently squeeze out the excess water
3. Your HyperKewl™ item is ready to wear!
